

College and university campuses take all of the challenging aspects of most other parking programs and combines them: short-term and long-term parking, the operational scale and enforcement concerns of a city, residential and commuter components, retail, large event, shuttle, gymnasium, library and even bicycle parking.

LAZ Parking knows that you constantly strive to balance parking for students, faculty and visitors while maximizing an ever-decreasing number of parking spaces and operating within budgetary constraints.

We understand the demands of the campus parking environment and we can help. Our nationwide experience in all parking disciplines attracts some of the country's largest and most prestigious schools as clients. With tight management controls and advanced technology, we alleviate the headaches of campus parking.

University Services

Green Parking (Parksmart)

After spending over a decade making green initiatives a top priority, LAZ Parking has become an industry leader in sustainable parking. As a Platinum Level founding partner to the Green Parking Council, LAZ is committed to working towards a cleaner, more sustainable parking environment through a variety of sustainability programs. These programs are the world's only rating systems that survey garage applicants, define and recognize sustainable practices in parking structure management, programming, design and technology and can help you achieve "Parksmart" certification.

Accredited Parking Organization (APO)

(APO) is a designation for parking organizations that have achieved a comprehensive standard of excellence. Launched in 2015 by IPI, the accreditation recognizes best practices in responsible parking management and operations, customer service, professional development, safety and security.
